Catppuccin Latte Theme for LaTeX Documents

1 Simple Paragraph

This is what a simple paragraph looks like. You can see that all the colors in this pallet complement each other and maintain an elegance all within the same proximity. The default text color is called **latteText** while the background color is called **latteBase**.

2 Math

You even can make math formulas, equations, and examples look nicer and more legible:

$$\lim_{n \to \infty} \int_a^b \frac{\sin(nx)}{x}\, dx$$

(Or just color dump like I did)

3 Code Snippets

Listing 1: A ruby on rails code sample

```ruby
class PageController < ApplicationController
  protect_from_forgery with: :exception
  before_action :do_some_for_pages

  '''
  This #new action creates a new page object and sets the
  '''
  def new
    @page = Page.new
    creator = current_user || @admin

    # Check if a creator is present
    if creator.present?
      @page.creator = creator.email
    end

    @page.description = 'This is the default description'
  end
end
```
